Is your Earthmoving Machine upkeep and maintenance a source of worry?

It could very well be that your Equipment downtimes are high and productivity is adversely effected.

Indifferent service provider, highly priced parts costs or it could be that you are pushed to source cheaper and poor quality parts from unreliable sources and render the "best in the business" equipment unviable.

In this back drop, **ICPS Engineering Pvt.Ltd.** offers you the most optimum and reliable solution for requirements of quality complaint parts and efficient repairs in a responsive manner such that you avail the best value for money.

The Company

Established as an Associate Company of **M/s Dahbashi Engineering Dubai (ISO 9001/140001 certified)** renowned for their Reliable and **Quality supply parts** for Caterpillar and other Earth moving machines **since 1985** and catering to over thousands of customers, ICPS provides the same level of service in India as extended by Dahbashi Engineering in their territories. With an international presence, the Group Company possess over 200 years of cumulative in house Caterpillar experience.

The Industry

The present day industry's practice is heavily **skewed towards high level of outsourcing** of parts and components by the manufacturer that go into the assembly of the equipment. This has stimulated the growth and **wider availability of parts from globally branded components manufacturers**. Over a period of many year **Dahbashi Engineering** has developed **reliable sources** of suppliers **Globally**. Channelising from these sources and offering a **comprehensive availability** through **efficient distribution** setups allows the customer a **reliable alternate source** and **relief from monopoly**.

QUALITY COMPLIANCE

The key to ensure supply of Quality complaint parts to the customers was not based merely on sourcing from Branded/Reputed suppliers but by carrying out in-house evaluations and continuous monitoring for consistency for quality compliance. The products also undergo the scrutiny and trials of in-house usage in our own during in house repairs of our customers' machines and thereafter monitored through our long established and tested Warranty Programmes. No wonder Dahbashi Engineering supplied parts pass the test, not merely in dimensional compliance but also by their eventual, long durable performances. Practices adopted under ISO 9001/2008 of balanced systems and procedures also support and contribute to their consistent overall operations. All this offers a reliable Genuine Alternative to the customer.

E-Connected Response

An unique Inventory Control and Parts Management Data base System -the Sourcenet, developed in house, allows on-line connectivity with Dahbashi Engineering for access to their Stock Inventory Data that facilitates instant response and serves to enhance performance with additional features. This programme allows identification of changed Part Nos. and details of Sub-Assemblies/Kits which enhances availability from among the \$200 million stock supported through information of Dahbashi Engineering supplier's inventory as well. State of the Art communications and structured logistical support contributes to prompt response and deliveries.

Economical Alternative

Quality complaint parts at optimal and affordable prices allows the user to source at costs which are truly best that Money can Buy. This translates into enhancing the equipment's economic viability through significantly lower maintenance and repair costs. The feasibility has been achieved by Dahbashi Engineering by sourcing directly from their suppliers and comprehensively stocking in their State of the Art **2000 square meter dust free air-conditioned** Facility, which houses parts and components for Engines, Drive trains, Hydraulics and Filters and which allows operational optimization and also early deliveries into India.

Training & Technical Support

A well-equipped Training Centre at Dahbashi Engineering offers Learning Programmes for the Group Personnel as also the Customers' Technicians and Maintenance Personnel.

Repairs & Maintenance Service

Our Service is supported by a highly trained, qualified and experienced team duly monitored by Dahbashi Engineering's technical setup. Their credibility, gathered over many years, bears testimony to the quality of inputs viz. totally reliable parts, technical expertise drawn from conformance to laid down procedures and practices which enables us to do it right every time. A suitably equipped Workshop facilitates fault analysis, diagnosis and repairs under controlled conditions.

In the race for Excellence there is no finishing line

The Group's quest for excellence is anchored on the belief that growth can be achieved and sustained through customer satisfaction and this is amply evidenced by over three decades of steady growth of credibility and trust.
